PROFILE

Junior Data Analyst and Data Scientist with over 2+ years of experience in data analytics, visualization, and machine learning. Proficient in Python, SQL, Tabula, and (BI) Business Intelligence, with a strong ability to extract actionable insights from complex datasets. Experienced in building interactive dashboards, automating reports, and developing predictive and real-time AI applications. Passionate about leveraging data to solve business problems and drive informed decision-making.

EDUCATION

Bachelor of Data Science

Institute of Management Sciences Peshawar | 2019 – 2023

DIT (diploma of information technology)

KPBT Brain Postgraduate College | 2018 – 2019

SKILLS

Data Analysis & Visualization: Pandas, NumPy, Excel, Seaborn, Statistics, Power BI, Tabula, Matplotlib, Data Preprocessing, ETL, Data Modeling / Data Warehousing

Machine Learning & Deep Learning: Supervised & Unsupervised Learning Algorithms, CNN, ANN, Data Cleaning.

Python Packages & Frameworks: Scikit-learn, SciPy, PySpark, Hadoop, Spacy, NLP

Web Development: Django, Flask, HTML

Programming Languages: Python, SQL, HTML, R

CERTIFICATIONS AND ACHIEVEMENTS

- Excel Basics for Data Analysis – Coursera
- Python 101 for Data Science – IBM **(Link)**
- Introduction to Data Science – 365 Data Science **(Link)**
- Introduction to Machine Learning – Coursera **(Link)**
- Neural Networks & Deep Learning – DeepLearning.AI **(Link)**
- Web Application with Django – University of Michigan **(Link)**
- Big Data 101 – IBM Developer Skills Network **(Link)**
- Introduction to Python – DataCamp **(Link)**
- Joining Data with Pandas – DataCamp **(Link)**
- Introduction to Networks – Cisco **(Link)**
- Probability and Statistics – Data365 (2023) **(Link)**

EXPERIENCE

Data Analyst
(Shafiq Arabzada Ltd) | Feb 2024 – Mar 2026

- Analyzed and visualized vehicle tyre sales and inventory data using Excel and Power BI to generate actionable insights.
- Built interactive KPI dashboards and reports, improving business insights and reporting efficiency.
- Automated weekly data reporting, reducing manual effort by 60%.

Machine learning intern (Link)
Codsoft (Remote) | Sep 2023 – Oct 2023

- Developed and fine-tuned machine learning algorithms to solve real-world data problems, improving accuracy and efficiency
- Worked with supervised learning algorithms and deployed solutions in real-time environments.

PROJECTS

Data Analysis

- Developed an interactive dashboard using transaction and customer data from a SQL database to provide real-time insights using Power BI. **(Link)**
- Developed a comprehensive Excel-based Sales Performance Dashboard to analyze product-wise, region-wise, and time-wise sales data. **(Link)**

Machine learning

- Developed a Machine Learning model to predict bank customer churn using classification algorithms to analyze customer behavior data to improve customer retention strategies and support data-driven decision-making.**(Link)**

Deep learning

- Marble crack detection using CNN to predict real-time marble cracks used in industrial applicationsto reduce cost. **(Link)**
- Built and deployed a deep learning model to detect common eye diseases. Integrated with a Flask web app for real-time predictions using uploaded images. **(Link)**
